

Controls for a world in motion

Wescon Controls' 2016 Annual Summer Shut Down

Friday, July 1 – Saturday, July 9, 2016

Wescon Controls will conduct its annual, summer shutdown in conjunction with the upcoming 4th of July Independence Day weekend. The shutdown includes our two manufacturing plants, located in Wichita, Kansas and Juarez, Mexico, as well as our logistics center in El Paso, Texas. Additionally, product samples, engineering resources (drawing or qualification), and/or quality support (PPAPs, etc.) will not be available.

The duration of our shutdown will be from Friday July 1st through Saturday, July 8th inclusive - to allow us time to perform maintenance on our equipment/facilities and to provide for our employees time to spend with their families. **WE WILL RESUME FULL OPERATIONS ON MONDAY, JULY 11TH.**

In order to serve our valued customers and suppliers, we intend to work closely with them during the last two weeks of June in order to satisfy their needs – in advance of the upcoming shutdown. If you have any questions, please contact us prior to the close of business on Thursday, June 30th.
